

## **Mr. Krishnakumar Nagarajan**

*IBM Distinguished Engineer and CTO, Energy & Sustainability*

Krishnakumar (KK) has over 29 years' extensive global experience in steering end to end digital transformation, first-of-its-kind digital rollouts as well as Greenfield initiatives towards positioning organization to embrace Industry 4.0 revolution and Sustainability. He is an Industry and Enterprise Architect, who has continuously increased his client and IBM impact leveraging IBM's architecture leadership. KK is Chemicals & Petroleum platinum member and IBM Industry Academy member. He is certified at "Thought Leader" level, highest level in IBM for Consulting services.

Furthermore, KK has keenly followed Sustainability trends and defined new architectures leveraging IBM and partner solutions for Smart Buildings and Analytics for Renewables performance management which catered to new competencies. He leads the collaboration and partnership with partners in the space of sustainability. He also keenly follows the standards and their impact on organizations and their path towards NetZero.

Prior to working in IBM, he has worked in TCS America where he was leading the Plant Automation Services and at Rockwell Automation where he set up a new profit center for Manufacturing Business Solutions.
